**Please note that experiential courses taught in the field instead of the classroom do not have regular meeting hours.**

**As noted in a recent e-mail from Victor Wilson (dated 9/8/16):**

"Research on student learning has repeatedly substantiated the fact that the most effective educational environment for college students is one in which there is meaningful interaction between faculty and students in settings outside the traditional classroom. Regular out-of-class interaction enhances the collegiate experience by allowing students to develop meaningful relationships with instructors who play significant roles in their lives at the university. "

We whole-heartedly agree with this philosophy, and endeavor to live this on the Maymester in Tanzania.
