FROM: Kathleen deMarrais, Associate Dean for Academic Programs

RE: MAT Proposals

As per your request, the following are responses to the questions the committee asked us to address.

- **Please clearly differentiate the two paths: MED and the MAT. Define an MED Degree Program and MAT Degree Program. How are they different?**
- **Expand on *What* you are doing and *Why.***
- **Are these requests a national trend?**

In AY2007, under the leadership of Dr. Jan Kettlewell, Associate Vice Chancellor for P-16 Initiatives, the Educator Preparation Academic Advisory Committee (EPAAC) passed a recommendation that defines both degrees for the University System of Georgia institutions (see attached M.A.T. Committee Report). As you can see from the text below, the Master of Arts in Teaching (MAT) is a program that leads to **initial teacher certification**. This approach to teacher education is known nationally as an “alternative” route to the more traditional four-year undergraduate program. The degree is intended for individuals who have undergraduate degrees in other related fields who decide they would like to pursue a teaching career. This degree is ideal for second career individuals as well. The Masters in Education degree is reserved for **already certified teachers** who wish to strengthen their content knowledge and understanding of the teaching/learning process. The following is an excerpt from the EPAAC recommendation:

1. *Principle: Within the University System of Georgia, the Master of Arts in Teaching (MAT) Degree will be a program that leads to initial teacher certification (Because the MAT includes at least two semesters of coursework at the post-baccalaureate level, initial certification will be at the T-5 level).*
2. *Principle: Graduate programs for teachers who are already certified will focus on both strengthening their content knowledge and on deepening their understanding of teaching and learning.*

Actions:

University System of Georgia institutions may offer two avenues for advanced study for teachers who are already certified: The Master of Education Degree through the College of Education; and the Master of Arts-Master of Science-

Master of Fine Arts Degree with a Teaching Emphasis through the College(s) of Arts and Sciences. The MAT will lead to T-5 teacher certification; the MS-MA-MFA with a Teaching Emphasis will not.

At the national level, over the past decade, there has been increased pressure on colleges of education to create alternative pathways for certification for students holding bachelors degrees, particularly those who are returning or second-career individuals. In part, this is to meet the increasing demand for teachers across the U.S. Nationally there is growth in the number of individuals entering the profession through routes other than the traditional four-year undergraduate program. These programs designed for college graduates or mid-career professionals are usually referred to as alternative certification programs. In 2007, 25.6% of all new USG-prepared teachers completed alternative-route programs. These alternative routes have been particularly attractive to students from diverse backgrounds. According to the 2007 USG Report on Teacher Preparation, of all new 2007 USG-prepared minority teachers, 35.9% were prepared through alternative-route programs. Among non-minority new teachers, only 23.2% completed alternative-route programs. Increasingly, these individuals have the content knowledge necessary, but lack the professional education component required for certification.

At the current time, many of the M.Ed. degrees in the College of Education are used for both initial teacher certification and for advanced study for already certified teachers seeking an additional degree. The new USG definitions assist us in differentiating the two pathways for masters degrees for teachers. With the agreement of all of the USG education deans, Dr. Jan Kettlewell asked that we request conversion of these programs in order to bring coherence and common definitions to all MAT and M.Ed. programs throughout the System. We intend to maintain the current M.Ed. for use by already certified teachers and use this new MAT degree as a route to initial teacher certification. The current M.Ed. degrees for the majors included in this request (Early Childhood, Education, Foreign Language Education, Mathematics Education, Middle School Education, Science Education, Social Studies Education, and Special Education) have existing options for (1) initial certification and (2) advanced study for already certified teachers. Hence, we are requesting approval for the M.A.T. degree designation for the existing initial certification option within these degrees. In the attached documents, we have provided sample programs of study for both degree options (MAT and M.Ed.) so the committee can review the differences. The primary difference across these programs between the MAT and MED are the courses required for certification, including field experiences and student teaching.

A second critical reason to distinguish between the degree names is that it will enable us to better track and report the number of teachers we are preparing through this alternative MAT degree. We must report the number of teachers we produce to both the Board of Regents Systems Office and to the Professional Standards Commission. With the MED designation used for both initial certification and for advanced teachers, it is impossible to distinguish these students using institutional research source. Clearly identifying MAT students in degrees conferred reports ensures accurate reporting of our performance measures to these bodies.

- **Provide a letter of support/approval from the College of Education Dean and the College of Arts and Sciences Dean. Include support letters for these requests.**

See attached.

- **How will you advertise/market? What is the market demand for these programs?**

Since initial certification at the masters level is already possible through our existing M.Ed., we have advertised through departmental web pages and through talking with prospective students. We have regular requests for this “alternative” masters route to certification. Many students who are looking for another career or second-career individuals call or email us to find out about MAT-type programs. This new degree designation would make the options more visible for students and would enable us to advertise more broadly. As was done in Occupational studies, we intend to create a college-wide flyer for distribution to announce our new degrees leading to teacher certification. In addition, with the support of STEM funding from the Board of Regents, we have just resourced an effort to recruit for our teacher education programs in mathematics, middle school, and science education. Many of these efforts will be directed toward this MAT pathway.

The Board of Regents is particularly interested in preparing more teachers to meet the state’s needs. There continues to be a teacher shortage in the state that the system has responded to with its Double the Numbers, Double the Diversity initiative where all system institutions were asked to double the number of teachers and double the number of diverse teachers entering the profession. The attached PowerPoint presentation is a report Dr. Kettlewell presented to the Vice Presidents on November 7, 2007. As you can see, all institutions are being asked to participate in increasing the number of teachers to meet the state’s demand. Many of these new teachers will be prepared through MAT programs.

- **It would be positive to mention how the MAT in Occupational Studies has grown/expanded, further supporting the need for these requests.**

Since its inception, the MAT in Occupational Studies has provided a model through which individuals holding bachelors degrees can complete both the masters and initial teacher certification. Since this degree was opened in AY2004, 63 students have completed the degree and are certified to teach. To show the growth, there was 1 graduate in 2004, 12 in 2005, 30 in 2006, and 20 in 2007 (to date).

- **Note whether there are any budgetary implications. If yes, explain.**

There are no budgetary implications for this proposal. The departments in which the programs are housed already do this work but within their existing M.Ed. degrees.

RE: MAT Proposals

The College of Education fully supports the enclosed proposals for MAT degree designations for the programs in Early Childhood, Education, Foreign Language Education, Mathematics Education, Middle School Education, Science Education, Social Studies Education, and Special Education. As is explained in the accompanying memo, this change from MED to MAT will enable the College to distinguish between the two degree tracks (initial and advanced teachers) and to better track the production of our initial alternatively certified students at the masters level for reporting purposes to the state.

Thank you for your consideration of these changes.

**Board of Regents of the University System of Georgia
Educator Preparation Academic Advisory Committee (EPAAC)
MAT Committee Report**

Five members of the MAT Committee¹ met on March 7, 2007: Hugh Ruppensburg, University of Georgia; Kent Layton, University of West Georgia; Ronnie Sheppard, Georgia Southern University; and Dorothy Zinsmeister and Jan Kettlewell, University System Office. The Committee drafted recommendations, sent them to EPAAC for feedback and to the Professional Standards Commission (PSC) to verify accuracy with state policies, and modified them accordingly. The Committee now submits this final report to EPAAC.

Recommendations: The MAT Committee recommends inclusion of two new principles and accompanying actions into the *Regents' Principles and Actions for the Preparation of Teachers for the Schools*.

1. *Principle: Within the University System of Georgia, the Master of Arts in Teaching (MAT) Degree will be a program that leads to initial teacher certification (Because program completion results in a master's degree, certification will be awarded by the PSC at level 5).*

Actions:

- Institutions currently offering master's degree programs that lead to initial teacher certification, other than the MAT, will seek administrative approval from the University System Vice Chancellor for Programs and Planning to rename them.
 - Institutions currently offering MAT degree programs that do not lead to initial teacher certification may redesign them and seek appropriate approvals in accordance with Principle 2, below.
 - All new MAT degree program proposals that are approved by the University System Vice Chancellor for Programs and Planning will lead to initial teacher certification at level 5.
2. *Principle: Graduate programs for teachers who are already certified will focus on both strengthening their content knowledge and on deepening their understanding of teaching and learning. (Following degree completion, PSC will award certification at level 5).*

Actions:

- University System of Georgia institutions may offer two avenues of study for teachers who are already certified: The Master of Education Degree through the College of Education; and the Master of Arts-Master of Science-Master of Fine Arts Degree with a Teaching Emphasis through the College(s) of Arts and Sciences. Both are considered "advanced" programs: Advanced degree work is accredited by NCATE and approved by the PSC for unit approval. The Education—Arts and Sciences collaborative structure within each institution is considered "the unit". The Education Dean is the titular head of the unit and is the liaison to the PSC.
- New master's degree program proposals for teachers (MAT, MED, MS-MA-MFA with a Teaching Emphasis) will be collaboratively developed by the College of Education and the College(s) of Arts and Sciences; they will include a blend of coursework in content and pedagogy.

Rationale: These recommendations are offered to solve two problems: 1) The University System Vice Chancellor for Programs and Planning requested EPAAC to establish consistent meaning for use of the degree nomenclature, MAT; and 2) institutions reported various issues either within or between Colleges of Education and College(s) of Arts and Sciences regarding collaboration and/or degree prerogative.

¹ The MAT Committee includes: Bob Parham, Augusta State University; Ronnie Sheppard, Bret Danilowicz, and Jane Hudak, Georgia Southern University; Kent Layton and David White, University of West Georgia; Louis Castenell, Kathleen Demarrais, and Hugh Ruppensburg, University of Georgia; Judy Carter and Joyce Jenkins, Fort Valley State University; Lettie Watford and David Garrison, Georgia Southwestern State University; Larnell Flannagan and Ray Wallace, Clayton State University; and Dorothy Zinsmeister and Jan Kettlewell, University System Office.

Subject: Conversion of Alternate M Eds to MATs

Hello all,

I promised to send you suggested language for seeking administrative approval for converting alternative M Ed programs that lead to initial teacher certification to MAT degree programs. Your request should be in letter form and it should come from your president to Frank Butler, Vice Chancellor for Academic, Faculty, and Student Affairs, with a cc to me. The text should go something like this:

I am writing to request administrative approval for converting the following existing majors within the Master of Education Degree to the Master of Arts Degree. Working with Jan Kettlewell, the USG Education Deans recently reached consensus on a definition of the Master of Arts in Teaching Degree. Its purpose is to offer a master's degree route to initial teacher certification for individuals who already hold a bachelor's degree in an academic discipline. The majors that we wish to convert to the MAT also lead to initial teacher certification. With the agreement of all of the USG education deans, Jan Kettlewell asked that we request conversion of these programs in order to bring coherence to MAT and M Ed programs throughout the System.

Please advise if questions.

Thanks, Jan

The University of Georgia

Franklin College of Arts and Sciences
Office of the Dean

December 16, 2007

Dr. Kathleen Demarrais
Associate Dean
Aderhold Hall
College of Education
UGA Campus

Dear Kathleen,

The Franklin College of Arts and Sciences supports the proposal of the College of Education to make the MAT a degree that leads to initial teacher certification. It will be offered by the College of Education as a result. As you know, there has been discussion about this proposal over the last several years at meetings involving deans and other representatives of colleges of arts and sciences and of education at units throughout the University System of Georgia. At a meeting earlier this year chaired by Jan Kettlewell, an agreement was reached that the MAT would lead to teacher certification and that MAT programs offered by colleges of arts and sciences in the USG would be renamed as a result. A representative of the Franklin College attended this meeting.

In the Franklin College of Arts and Sciences, there is to my knowledge only one remaining degree track with the MAT designation. This degree is in English, and that department is now discussing a new designation for that degree.

Let me know if you need further information from the Franklin College concerning this matter.

Cordially,

Hugh Ruppensburg
Senior Assoc. Dean

College of Education
MAT Proposal
Early Childhood Education

The early childhood certification option (ECCO) in the MAT program is designed for candidates seeking initial certification to teach children in prekindergarten to grade 5. Candidates in ECCO are recommended for T4 certification after they successfully complete student teaching and submit a certification portfolio that is approved by the ECCO faculty. To obtain T4 certification, candidates must pass the Early Childhood Education Assessment of the Georgia Assessments for the Certification of Educators (GACE) and submit an application for certification to the Georgia Professional Standards Commission.

Proposed MAT Currently MED+ initial certification (minimum of 51 graduate credit hours plus 3 undergraduate hours in special education)	MED for Advanced Teachers (already certified) 36 semester Hours
<p>Courses include an undergraduate course in special education plus a minimum of 13 graduate courses (12 three-hour courses and a fifteen-hour student teaching course). At least 6 courses must have an EDEC or EDMS prefix; at least 3 courses must be from outside the department; at least 1 course must meet the diversity requirement. The 13 graduate courses also must be in the following areas:</p> <p>AREA A: Curriculum and Teaching in Early Childhood Environments (4–5 courses, 12–15 credit hours) <u>Required Courses</u> EDEC 7020 Theory and Curriculum in Early Childhood Education EDEC 7040 Induction to Teaching (required for degree; taken after certification is awarded)</p> <p><u>Other Courses</u> EDEC 7010 Trends and Issues in Early Childhood Education EDEC 7050 Problems of Teaching in Early Childhood Education EDEC 7060 Academic Community Learning EDEC 7130 Teaching Styles in the Elementary Classroom EDEC 7160 Instructional Strategies for Early Childhood Education EDEC 7190 Educational Environments for Young Children: Birth–Eight EDEC 7420 Organization of Early Childhood Classrooms</p> <p>AREA B: Historical, Philosophical, and Social Foundations (1 course, 3 credit hours) CHFD 7150 Families, Schools, and Communities EDEC 7120 Children’s Social Lives EDEC 7180 Understanding Cultural and Linguistic Diversity in Schools (corequisite: EDEC 7180L)</p>	<p>The advanced M.Ed. program in early childhood education consists of 12 courses (36 semester hours). A minimum of 6 of the 12 courses must have an EDEC or EDMS prefix, and a minimum of 3 courses should be taken outside the Department of Elementary and Social Studies Education. At least 1 course must meet the diversity requirement.</p> <p>AREA A: Curriculum and Teaching in Early Childhood Environments (at least 4 courses) EDEC 7010 Trends and Issues in Early Childhood Education EDEC 7020 Theory and Curriculum in Early Childhood Education EDEC 7050 Problems of Teaching in Early Childhood Education EDEC 7060 Academic Community Learning EDEC 7130 Teaching Styles in the Elementary Classroom EDEC 7160 Instructional Strategies for Early Childhood Education EDEC 7190 Educational Environments for Young Children: Birth–Eight EDEC 7420 Organization of Early Childhood Classroom</p> <p>AREA B: Historical, Philosophical, and Social Foundations (at least 1 course) EDEC 7120 Children’s Social Lives EDEC 7180 Understanding Cultural and Linguistic Diversity in Schools (corequisite: EDEC 7180L)</p>

MATHEMATICS EDUCATION– SECONDARY SCHOOL

This program is designed for the applicant who has earned an undergraduate degree in mathematics or a related subject area and now seeks state certification in Mathematics Education to teach in Georgia public schools, grades 7-12 *and* a master's degree from the University of Georgia (which leads to T-5 certification). The total number of mathematics content courses from the bachelor's, masters, and courses taken for certification must be at least 17 (with 8 being upper division). **All other certification requirements must be met in order for UGA to recommend the individual for certification.**

teaching field.

****Note:** The total number of mathematics content courses from the bachelor's, masters, and courses taken for certification must be at least 17.

Research (3 hours)

Typically ERSH 6200, 6300, or 6600

Electives (Two approved elective courses, applied project, or thesis required)

Plan A requires an applied project or thesis with 3 hours of appropriate enrollment

Plan B requires 6 hours of elective courses (EMAT 7460 or 7700 can be used here)

Additional requirements: Written comprehensive exams must be passed.

***Note:** All candidates for certification must meet requirements for certification. These requirements may necessitate taking courses beyond those needed for the MEd. At the present time, these requirements include 2 courses in educational foundations, 1 course in the nature of exceptionality, and student teaching or an internship. These courses may or may not fit into the program of study for the masters degree. In addition, all candidates must obtain a passing score on GACE test to be eligible to apply for certification.*

College of Education
MAT Proposal
SCIENCE EDUCATION

In the Department of Science Education, the objective of graduate work is to assist students in acquiring knowledge and skills in both the teaching of science and in their specific discipline beyond that possible in a baccalaureate degree. Depending on the student's interest and experience, the focus of additional study can be the teaching of science at the elementary, middle, secondary or higher education levels.

Completion of the Masters programs in science education is intended to prepare students to serve as master teachers, department chairpersons, or science instructional supervisors in school systems, and leads to certification at the T-5 level for the State of Georgia.

Those wishing to complete initial certification must meet all state requirements, including a course in special education and a supervised student teaching/internship experience. These courses may not fit in the masters degree program of study.

Proposed MAT (Currently MED=initial certification)	MED for Advanced Teachers (already certified) 36 Semester Hours

Curriculum and Instruction in Science Education. (12 semester hours)

A minimum of 12 semester hours in science education are required. ESCI 7040 and 7080 are essential core courses. At least one year of teaching is required concurrent with or prior to taking ESCI 7040 and 7080. Commonly used courses include the following:

ESCI 6000: Special Problems in Science Education
ESCI 6200: Methods of Teaching Science to students with Special Educational Needs
ESCI 6220: Marine Science Education

ESCI 6230: Environmental Science Education
ESCI 6420: Science for Early Childhood Education
ESCI 6480: Technological Capabilities for Science Teaching
ESCI 7020: Teaching Science in the Elementary School
ESCI 7040: Teaching Strategies for Middle and Secondary Science Teachers
ESCI 7060: Technology in Science Education
ESCI 7080: Curriculum Planning in Science Education

Education Foundations (6 semester hours, one in psychological and one in social foundations)

A minimum of six semester hours of coursework in educational foundations is required. The goal is to achieve adequate knowledge in the history and philosophy of education, psychological and sociological foundations of education and multicultural education.

EPSY 6010: Foundations of Human Development
EPSY 6800: Foundations of Cognition for Education
EPSY 7110: Characteristics of Gifted Children
ERSH 7600: Construction of Education Measuring Instruments
EPSY 8180: Psychology of Learning and Instruction
ESCI 8210: Multicultural Education Research

Research (6 semester hours)

A minimum requirement of three semester hours plus ESCI 7650 are required.

ERSH 6200: Methods of Research in Education
ESCI 6990: Research Seminar in Science Education
ESCI 7650: Applied Project in Science Education

Portfolio Requirements

The portfolio will address five standards based on those in the NSTA document, with three being mandatory and two others being selected by the student. The mandatory standards are (a) content/nature of science (combination of NSTA standards 1 and 2), (b) curriculum (NSTA standard 6), and (c) social context (NSTA standard 7).

ESCI 6000: Special Problems in Science Education
ESCI 6200: Methods of Teaching Science to students with Special Educational Needs
ESCI 6220: Marine Science Education

ESCI 6230: Environmental Science Education
ESCI 6420: Science for Early Childhood Education
ESCI 6480: Technological Capabilities for Science Teaching
ESCI 7020: Teaching Science in the Elementary School
ESCI 7040: Teaching Strategies for Middle and Secondary Science Teachers
ESCI 7060: Technology in Science Education
ESCI 7080: Curriculum Planning in Science Education

Education Foundations (6 semester hours, one in psychological and one in social foundations)

A minimum of six semester hours of coursework in educational foundations is required. The goal is to achieve adequate knowledge in the history and philosophy of education, psychological and sociological foundations of education and multicultural education.

EPSY 6010: Foundations of Human Development
EPSY 6800: Foundations of Cognition for Education
EPSY 7110: Characteristics of Gifted Children
ERSH 7600: Construction of Education Measuring Instruments
EPSY 8180: Psychology of Learning and Instruction
ESCI 8210: Multicultural Education Research

Research (6 semester hours)

A minimum requirement of three semester hours plus ESCI 7650 are required.

ERSH 6200: Methods of Research in Education
ESCI 6990: Research Seminar in Science Education
ESCI 7650: Applied Project in Science Education

Portfolio Requirements

The portfolio will address five standards based on those in the NSTA document, with three being mandatory and two others being selected by the student. The mandatory standards are (a) content/nature of science (combination of NSTA standards 1 and 2), (b) curriculum (NSTA standard 6), and (c) social context (NSTA standard 7).

The following indicators are added to the social context standard to make the multicultural nature of science teaching and learning explicit:

- designs and employs a range of learning activities that address the needs of culturally, ethnically, and economically diverse learners
- demonstrates an understanding of students with special needs and ways in which their special needs may be accommodated in the science learning environment

The details of the portfolio contents are specified in the rubric

College of Education MAT Proposal

The following indicators are added to the social context standard to make the multicultural nature of science teaching and learning explicit:

- designs and employs a range of learning activities that address the needs of culturally, ethnically, and economically diverse learners
- demonstrates an understanding of students with special needs and ways in which their special needs may be accommodated in the science learning environment

The details of the portfolio contents are specified in the rubric attached to this description. Three pieces of evidence for each of five standards must be represented in the portfolio, in addition to a table of contents and a critical autobiography (which is completed as an assignment in the ESCI 7650 course).

***Note:** All candidates for certification must meet requirements for certification. These requirements may necessitate taking courses beyond those needed for the MEd. At the present time, these requirements include 2 courses in educational foundations, 1 course in the nature of exceptionality, and student teaching or an internship. Education [Prereq: ERSH 8310] (3 credit hours)

QUAL 8400 Qualitative Research Traditions [Prereq: ERSH
6200] (3 credit hours)

QUAL 8410 Designing Qualitative Research

EDMS (EDEC) (QUAL) 7500 Action Research [Prereq:
Permission of Department] (3 credit hours)

Board of Regents Strategic Plan

Goal 4 Progress in Teacher Production

Jan Kettlewell
November 7, 2007

- ### Goal 4
- Strengthening USG's partnerships with the state's other education agencies
 - Endorse and help implement the goals adopted by the Alliance of Education Agency Heads.
 - Increase the high school graduation rate, decrease high school drop-out rate, and increase post-secondary enrollment rates
 - Strengthen teacher quality, recruitment, and retention
 - Improve workforce readiness skills
 - Develop strong educational leaders, particularly at the building level
 - Improve the SAT/ACT scores of Georgia students

- ### Two Board Initiatives
- *Regents' Principles for the Preparation of Teachers for the Schools*
 - First class of teachers entered schools in 2002
 - *Principles* called upon USG institutions to increase their responsiveness to needs of schools
 - Double the Number, Double the Diversity of Teachers Prepared by the USG
 - Baseline—2004
 - Today—progress on USG teacher production since 2002 and 2004

- ### USG 2007 Report*
- #### Highlights
- Since 2002, USG has prepared over 20,100 new teachers
 - In 2007, USG prepared 44% more teachers than in 2002
 - In 2007, USG prepared 21% more teachers than in 2004
 - In 2007, USG prepared 17% more minority teachers than in 2004
- *2007 Report on Teacher Preparation at USG Institutions to be released 11/13/07

- ### USG 2007 Report*
- #### Highlights
- USG has a 77% yield rate—teachers prepared by USG one year who are teaching in the Georgia public schools the next year
 - USG prepared teachers have lower teacher attrition rate after one-year of teaching in the Georgia public schools than non-USG prepared teachers
 - 5% attrition rate for USG prepared teachers
 - 14% attrition rate for non-USG prepared teachers
- *2007 Report on Teacher Preparation at USG Institutions to be released 11/13/07
