Dean, Franklin College of Arts and Sciences

Dear Dean Dorsey:

Please find enclosed our proposal for an Area of Emphasis in Applied Mathematics within the Mathematics undergraduate major. The proposed program would offer an alternative route to completing a B.S. in Mathematics, substituting course work with direct scientific applications for some of the more theoretical course requirements in the standard major.

In preparing this proposal we have benefited from extensive consultations with Fiona Liken of the Office of the Vice President for Instruction, so we are confident that it complies with the relevant UGA policies.

The faculty of the Department yesterday voted enthusiastically and unanimously (30-0) in favor of the proposal. We feel that it will serve the undergraduates of the Franklin College well, and may draw significant numbers of new students to major in our subject.

Sincerely,

Malcolm R. Adams
Head, Department of Mathematics
